# Correction: Molecular investigation of malaria-infected patients in Djibouti city (2018–2021)

Rahma Abdi Moussa<sup>1,2,3</sup>, Nasserline Papa Mze<sup>1,2</sup>, Houssein Yonis Arreh<sup>4</sup>, Aicha Abdillahi Hamoud<sup>3</sup>, Kahiya Mohamed Alaleh<sup>3</sup>, Abdoul-Razak Yonis Omar<sup>5</sup>, Warsama Osman Abdi<sup>6</sup>, Samatar Kayad Guelleh<sup>7</sup>, Abdoul-Ilah Ahmed Abdi<sup>8</sup>, Mohamed Houmed Aboubaker<sup>3</sup>, Leonardo K. Basco<sup>1,2</sup>, Bouh Abdi Khaireh<sup>9</sup> and Hervé Bogreau<sup>1,2,10\*</sup>

**Correction: Malaria Journal (2023) 22:147**  
<https://doi.org/10.1186/s12936-023-04546-x>

Following publication of the original article [1], the authors flagged an error in the following sentence: "*Plasmodium falciparum* strains with deleted Pfhrp2 gene, which is less detectable by many currently available

RDTs, would then have an advantage over the *P. vivax* strains in the face of control strategies based increasingly on RDTs and post-diagnostic treatment only policy".

Namely, the sentence previously (incorrectly) referred to "wild-type' *P. falciparum* strains" instead of "*P. vivax* strains".

The authors thank you for reading this corrections and apologize for any inconvenience caused.

The original article can be found online at <https://doi.org/10.1186/s12936-023-04546-x>.
